Wheat Subsidies**	\$17,805
Sorghum Subsidies**	\$8,117

Note: The information on conservation spending for 2010 is incomplete due to missing data from USDA's Natural Resource Conservation Service. Payment data currently are not included for the Environmental Quality Incentives Program, but will be added once NRCS makes it available.

The information provided for the Wetland Reserve Program (WRP) provides an inaccurate picture of how WRP payments are distributed. USDA's Natural Resource Conservation Service uses title companies as intermediaries to finalize wetlands easements under the Wetlands Reserve Program. As a result, the data provided to us shows large sums of money going to these title companies. In reality, the payments are ultimately distributed to landowners participating in the WRP.

Unfortunately, NRCS has not provided the data to show where these farms and wetlands are located or which farmers or landowners are enrolling in the program, so EWG is unable to allocate these large sums of money to individuals beyond the title companies. Therefore, these companies skew the conservation rankings and payment concentration, which EWG cannot avoid unless and until NRCS makes available the additional farm attribution data. Therefore, we have not included WRP payments in the 2010 data update.

We have separated data on farm commodity, disaster and conservation payments in order to provide a more accurate picture of top recipients and concentration of payments among the three main categories of USDA programs.

Finally, EWG works hard to ensure the accuracy of the information it provides through its products and services, but obtains data for the Farm Subsidy Database from the U.S. Department of Agriculture pursuant to the Freedom of Information Act. Therefore, EWG cannot guarantee the accuracy of the information USDA provides or any analysis based thereon. If you find an error or discrepancy on the site, please contact your local USDA Farm Service Agency office to check its records before contacting EWG.
